

2017 Street Resurfacing Project  
Summary of Pre-Bid Meeting  
February 16, 2017  
ESG Operations Conference Room

The Meeting was attended by John Shepherd, Jr with ESG Operations and Matt Mitchell with The Scruggs Company.

Bids will be opened at 2:00 pm on February 28, 2018 at City Hall in the 2<sup>nd</sup> Floor Conference Room.

The Bid includes resurfacing 11 streets with about 3,690 tons of asphalt pavement. It will also include striping and raising manholes and valve boxes.

The project time is 120 days and is negotiable at the time of contract completion. Liquidated damages are \$300 per day.

Clipping shoulder, cleaning pavement and finish grading shoulders after paving are part of the contract and should be included in appropriate pay items.

Placement of tack coat and prime should be in accordance with GDOT procedures and will be determined in the field. The pay items will remain in the Bid Schedule.

Addendum #1 has been issued with street measurements. The measurements were taken at only a few locations on each street. Bidder should take measurements if more accurate measurements are needed.

There was a discussion about replacing the single surface treatment with open graded crack relief interlayer (OGI). This mix is easier to install and has been used by several local municipalities. The City will research this alternative further and add to Addendum 2 if approved.
